

Viking Line Cargo information

Booking of LNG fueled trucks

We are pleased to announce that we are now also able to transport LNG (liquefied natural gas) units onboard our vessels. The LNG-units need to be booked in advance (via our freight portal or via freight-booking department) because there is limited capacity reserved for LNG-units onboard each vessel. Initially, regardless that these units onboard are IMDG-classified, we will not charge an extra surcharge for the transport.

Trucks running on LNG has recently increased in numbers in the cross-border traffic. Our experts have worked to solve all the questions and ensure safe transport onboard. Currently all necessary safety measures are in place and we welcome LNG-units onboard.

Vessels annual spring service and maintenance days

Viking Grace will have her service days in April, during week 17. Viking Grace will be the only vessel taken out of traffic this spring for short service and maintenance work. During Viking Grace service days, there will only be one vessel operating our Turku-Åland-Stockholm-line. These planned interruptions in otherwise regular and frequent traffic are unwelcomed, but very necessary for the vessels to be able to renew some of its traffic certificates required by the authorities.

Border crossing rules and regulations to Finland

The Finnish border guard authority (Raja) is updating their homepage with latest guidelines for border traffic during the pandemic. For more information, kindly visit (in English): raja.fi/en/guidelines-for-border-traffic-during-pandemic
