Viking Line Cargo information

New service available on Helsinki-Tallinn route!

We are now able to offer a new service on Viking XPRS, the service is called **Pole Position** and it's available on all Viking XPRS departures between Helsinki and Tallinn!

Pole Position service is a new express service, where these Pole Position units will be offloaded first in the arrival port which offers a faster exit out of the port area.

The service has been tested during the past weeks and we are now able to offer the Pole Position service to all our customers. The test period indicates a time saving of 20-30 minutes exiting the port area, depending on other traffic taking place simultaneously.

For more information and setup for Pole Position bookings - kindly contact our sales staff;

Kai Mäkinen
